

HYBRID ADVANTAGES

- Wide adaptation from 110 to 112 zone, east to west, including south of zone
- Great seedling vigor for planting in cooler soils
- Responds to fungicide
- Best in moderate to highly productive fields

POSITIONING & MANAGEMENT

This 111-day hybrid offers geographic flexibility with its ability to move north and south of its zone. LH 6155 VT2 PRO RIB produces high-quality, high test weight grain on a flex ear that maintains consistent size across populations. This hybrid has a great disease package and shows best performance in moderate to high productivity fields. LH 6155 VT2 PRO RIB is a Grain First / Silage Capable hybrid.
